ABOUT

FJORD COFFEE

All the coffee used and sold at Silo is roasted by Berlin based Fjord Coffee Roasters

Fjord only work with specialty grade coffee, primarily due to the superior quality and taste of the beans. The higher price paid for specialty grade coffee allows for a more sustainable economic relationship between the coffee producer and the drinker.

GREEN PROJECTS

We make a conscious effort to try and reduce our environmental impact, by using ecologically friendly cleaning products, being mindful of our recycling & waste systems and getting our coffee delivered in reusable tins among other things.

We can always do better and continue to improve, here are a couple of things we are doing where we need your help:

Refuse the Straw!

We do not use plastic straws at Silo. Instead we offer glass straws with our cold drinks. Yes, these glass straws are cool - but please do not steal them. They are expensive and if they get stolen we can't afford to keep using them. We sell them as affordably as we can - 2,5€.

Take Away Coffee in Reusable Cups

We offer extra stamps on our loyalty cards if you get your take away coffee in a reusable cup.

Tote - Reuse this tote, it's made for Life!

Aside from us selecting a durable and organic material for our Tote, we are also donating 1€ for each tote sold to CoolEarth.org

SUPPLIERS

Thank you to these producers for helping us do what we do:

Sironi, Eiland Grimme, Brodowin Milch, Markthalle 9, Berliner Berg, Companion Tea, Fjord Coffee.
